

BENEFITS FOR COMPANIES WITH CYBER INSURANCE

# IMPLEMENTING BULLWALL CAN LOWER YOUR CYBER INSURANCE PREMIUMS

With ransomware attacks increasing by more than 232% over the last four years, cyber insurers are enforcing stricter coverage requirements. Even with guidelines in place, ransomware attacks cost companies an average of \$4.62 million to recover. As more organizations seek to protect themselves with cyber insurance and payouts surge, insurance premiums are also surging. In 2022, rates increased by an average of 74%, on top of an increase of 94% in 2021.

## THE BULLWALL SOLUTION

Commonly used EDR security solutions can't keep up with ever-evolving cybercriminals and attack vectors. Sooner or later, a ransomware agent will slip through.

***When a ransomware attack begins, BullWall detects the abnormal file activity, stops file encryption within seconds, quarantines the infected user and protects your critical IT infrastructure and data storage – on-premises and in the cloud.***

BullWall offers the only ransomware containment solution that automatically contains an attack in progress. With BullWall, your organization may also be eligible for discounted cyber liability insurance premiums.

*Thanks to BullWall, our school's cyber security policy was successfully renewed, even as other schools were being dropped. It even helped us qualify for a discount.*

New York University

**DETECT**

BullWall uses 28 sensors and machine learning to monitor file activity and identify abnormal events.

**ISOLATE**

BullWall stops active attacks, quarantine the infected user & device, and protects your critical IT infrastructure.

**REPORT**

BullWall notifies your IT team within seconds and provides a report of compromised devices and files to expedite recovery.

**NO ENCRYPTION,  
NO RANSOM**

BullWall eliminates ransom demands by stopping malicious encryption in seconds.

**NO EXFILTRATION,  
NO EXTORTION**

BullWall minimizes extortion and protects PII by preventing malicious data exfiltration.

**NO DOWNTIME,  
NO WORRIES**

BullWall thwarts and isolates attacks before the damage can spread, so there's no downtime.

**THE ONLY SOLUTION OF ITS KIND**

The only solution of its kind, BullWall is agentless, lightweight, and easy to get up and running. Entirely automated, the system requires no hands-on monitoring and can be integrated with your other security solutions.

**ABOUT BULLWALL**

BullWall is a cybersecurity solution provider with a dedicated focus on protecting critical IT infrastructure from ransomware. We provide rapid containment of active attacks, and safeguard servers by preventing unauthorized intrusion.
